

HES SERIES

Horizontal End Suction Centrifugal Pumps

OVERVIEW

The **HES Series** consists of single-stage horizontal end suction centrifugal pumps designed for general water transfer and circulation duties.

KEY FEATURES

- Single-stage end suction design
- Robust horizontal construction
- High hydraulic efficiency

OPERATING CONDITIONS

- Continuous duty
- Clean or lightly contaminated liquids
- Liquid temperature: up to **+90°C**

GENERAL TECHNICAL RANGE

Capacity (Q) : 2 – 3,500 m³/h

Head (H) : up to 180 m

Power (P) : up to 1.000 kW

APPLICATIONS

- HVAC circulation
- Water supply and distribution
- Firefighting systems
- Industrial process water
