

SCP SERIES

Split Case Centrifugal Pumps

OVERVIEW

The **SCP Series** consists of double suction split case centrifugal pumps developed for high-capacity water transfer applications requiring stable performance and ease of maintenance.

KEY FEATURES

- Double suction impeller
- Balanced hydraulic load
- Split casing for easy servicing

OPERATING CONDITIONS

- Continuous duty
- Clean water and low-viscosity liquids
- Horizontal or vertical installation

GENERAL TECHNICAL RANGE

Capacity (Q) : 70 – 10.000 m³/h

Head (H) : up to 215 m

Power (P) : up to 2.000 kW

APPLICATIONS

- Municipal water supply
- District cooling systems
- Power plants
- Large industrial facilities
